- D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation _____ acres; Stockwatering _____; Domestic _____
Other (specify) _____

- E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)
PROPERTY SOLD

- F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

- a. Are you now employing water conservation efforts? YES _____ NO _____
Describe any water conservation efforts you have initiated: _____

- b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)

Reductions in consumptive use:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO _____
- b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)
I have data to support the above surface water use reductions due to wastewater reclamation. YES _____ NO _____

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES _____ NO _____
- b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

19 _____ (af/mg) 19 _____ (af/mg) 19 _____ (af/mg)
I have data to support the above surface water use reductions due to conjunctive use efforts. YES _____ NO _____

I understand that it may be necessary to document the water savings claimed in "F." above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Re: Filing of Statement of Diversion -
Rancho Las Flores

Dear Oliver:

The State Water Resources Control Board, Diversion of Water Rights from WR 40-1 (2/90) have been completed for the following Supplemental Statement of Water Diversion and Use;

S-1457 - Horsethief Creek
S-1458 - Grass Valley
S-1459 - Beaver Pond
S-1460 - Upper Diversion - West Fork Mojave River
S-1461 - Lower Diversion - West Fork Mojave River

The quantities are results of regular measurements made by our firm except for the Upper and Lower Diversions of the West Fork Mojave River. These Diversion quantities are from the State Department of Water Resources and are a result of releases from the State Aqueduct in lieu of the destruction of the diversion.

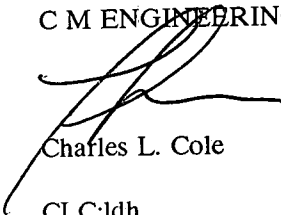

I am sending copies to Don Owen and Dick Anderson. Please sign the documents where indicated and mail so the Division of Water Rights will receive this prior to July 1, 1991.

Also included is an updated summary of diversions for your use.

If you have any questions, please call.

Very truly yours,

C M ENGINEERING ASSOCIATES, INC.

Charles L. Cole

Subject: Water Rights Filings

Gentlemen:

Recently an in-depth review was made of the water rights and records for the Diverter of Record: Las Flores Group, Inc. Additional or revised filings are included to clarify their water rights. We ask that the enclosed applications be included as part of the record.

Please note that the ownership has been changed to RANCHO LAS FLORES LIMITED PARTNERSHIP. All prior filings in the name of Las Flores Group, Inc. are to be changed to reflect this change in ownership name. The mailing address is to remain the same.

AWR's update

Several previously filed records indicate usage which appears to be high, new usage numbers were figured based on better data for the following water rights:

Statement 1457-1973 to 1978 ✓
Statement 1458-1973 to 1978 ✓
Statement 1459-1973 to 1978 ✓

In some cases filings were not made for years where usage occurred:

Statement 1459-1979 to 1983 ✓
Application 10831-License 5717-1986 to 1988
Application 10550-License 5716-1986 to 1991
Well Recordation No. 363162-1980 Annual Recordation Notice
Well Recordation No. 363165-1980 Annual Recordation Notice
Well Recordation No. 363164-1980 Annual Recordation Notice
Well Recordation No. 363166-1980 Annual Recordation Notice
Well Recordation No. 363158-1980 Annual Recordation Notice

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockpounds Constructed Prior to 1969"
- "Appropriation of Water in California"

Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockpounds Constructed Prior to 1969"
- "Appropriation of Water in California"

State of California
The Resources Agency
DEPARTMENT OF WATER RESOURCES

AGREEMENT BETWEEN THE STATE OF CALIFORNIA
DEPARTMENT OF WATER RESOURCES AND THE LAS FLORES RANCH, LTD.,
FOR OPERATION OF LAS FLORES RANCH DIVERSION

THIS AGREEMENT, made this 16th day of April 1980

pursuant to the provisions of the California Water Resources Development Bond Act, the State Central Valley Project Act, and other applicable laws of the State of California between the State of California, acting by and through its Department of Water Resources, hereinafter called the "State", and the Las Flores Ranch, Ltd. hereinafter called the "Ranch".

RECITALS:

A. The State is authorized to construct and operate facilities for the conveyance and storage of water.

B. The State constructed Cedar Springs Dam as a part of the State Water Project for the storage and regulation of project waters.

C. The construction of Cedar Springs Dam interfered with the natural flow regimen of the West Fork of the Mojave River upstream from the Ranch.

D. As a result of construction of Cedar Springs Dam the State removed stream diversion works owned and operated by the Ranch and constructed a replacement for the diversion works within State right-of-way. These works, beginning at the Mojave Siphon and consisting of 3290 feet of pipeline extending to and including a dissipator structure with a design capacity of 23 cubic feet per second, shall hereinafter be called the Ranch Diversion.

E. Operation of the Ranch Diversion can affect the amount of water the Ranch receives that can be put to beneficial use. The Ranch wishes to have

releases through the diversion approximate as nearly as possible the natural flow rates that would have existed without Cedar Springs Dam.

F. The parties to this agreement desire to establish mutually agreeable operational criteria, and to provide for joint operational safeguards for the State's Ranch Diversion and for facilities of the Ranch within State right-of-way.

NOW THEREFORE, it is mutually agreed as follows:

A. INTRODUCTORY PROVISIONS

1. The State and Ranch agree to the operation of the Ranch Diversion, under the provisions set forth hereinafter, until a change is mutually agreed upon in writing. Neither party shall unreasonably withhold its consent to a change in operational provisions.

2. This agreement shall become effective on the date first above written and shall remain in effect until such time as is mutually agreed upon by the Ranch or its assigns and the State to terminate the agreement.

3. The State and Ranch agree that: (a) the Ranch Diversion is at least equal to the diversion removed during construction of Cedar Springs Dam in both reliability and capacity; and (b) the construction and operation of such Ranch Diversion by State in accordance with the terms of this agreement shall constitute full satisfaction to Ranch for (1) any interference with the ability of Ranch to divert or take water from the Mojave River or its tributaries, (2) any increased costs which may be incurred by Ranch by virtue of water being delivered or furnished to Ranch at a point below the diversion facility formerly used by Ranch, and (3) the taking of or interference with such diversion facility.

4. The State does not by this agreement assume an obligation to store in its facilities or release natural inflow to the Ranch in greater amounts than the Ranch would have obtained had the Department's project facilities not been constructed, or to a greater extent than is necessary to

preserve reasonable, beneficial uses of the Ranch.

B. OPERATIONAL PROVISIONS

5. The State agrees to operate and maintain the State-owned Ranch Diversion up to but not including the dissipator structure, also owned by the State, under the provisions set forth herein until a change is mutually agreed upon in writing.

6. The Ranch agrees to operate and maintain all Ranch facilities, and the dissipator structure, used in the conveyance of water over State rights-of-way, in a good state of repair, as determined by the State.

7. During emergency caused by total or partial failure of any State facilities, which in the judgment of the State would make it necessary to reduce or shut down the flows through the Ranch Diversion in advance of the time the Ranch could be notified, the State shall take the necessary action and shall, as soon thereafter as possible, notify the Ranch of such action by telephone or other expedient means.

8. Notification of changes and requests for changes in flow rates through the Ranch Diversion supplying natural stream flows to the Ranch will be made to the following prior to such changes, except in case of emergency as defined in Article 7 above.

Department of Water Resources
Castaic Operation and Maintenance Center
P.O. Box 98
Castaic, CA 91310

Telephone: (805) 257-3610

Las Flores Ranch, Ltd.
Summit, CA 92387

Telephone: (714) 389-2217

9. Within the limitations described in paragraph 4 above, the State will make a reasonable effort to make releases from Silverwood Lake and the Ranch Diversion at flow rates equal to the rate of natural streamflow entering the Lake.

10. During low flow periods the State will endeavor to closely regulate flow through the Ranch Diversion so as not to exceed the natural inflow rate to the Lake. Exceeding the inflow rate under low flow conditions could cause a hardship on the Ranch when later adjustments are made to balance quantities. In making such adjustments the State will not reduce the flow to the Ranch below 50% of inflow to the Lake.

11. In the event the State is unable to make releases through the Ranch Diversion, the Ranch will have the option of receiving releases through the dam outlet works or deferring releases until releases can be resumed through the Ranch Diversion Provided the Ranch is not responsible for the outage. The State shall not be obligated to make deferred releases if the Ranch is responsible for the outage.

12. The State will provide to the Ranch such stream flow records as may be available for areas tributary to Silverwood Lake at regular monthly intervals. The records supplied to the Ranch will include data on releases through the Ranch Diversion.

13. The total of (1) releases downstream from Cedar Springs Dam plus (2) releases through the Ranch Diversion will be based upon flow relationships taken from attached Exhibit A. These flow relationships shall be used until such time as new flow relationships have been mutually agreed upon. Neither party shall arbitrarily withhold its consent to agreement if a more accurate relationship is shown to exist.

C. SPECIAL PROVISIONS

14. The Ranch shall have the right of access over the property labeled "Area of Access" on the map attached hereto as Exhibit B for the purpose of operating and maintaining its portion of the Ranch Diversion and appurtenant irrigation system on State property.

15. The Ranch is responsible for all liability for personal injury or property damage which may arise out of Ranch acts done pursuant hereto or which may arise out of the failure of the Ranch to perform its obligations under this agreement, excepting only such injury or damage as is caused by the negligence or willful misconduct of the State, or its officers or employees or persons or entities operating with the consent of the State. In the event any claim of liability for which the Ranch is responsible is instituted against the State of California, or any department, officer or employee thereof, the Ranch shall defend, indemnify and hold each of them harmless from such claim.

16. The contracting officer of the State shall be the Director of Water Resources of the State of California and his successors, or their duly authorized representatives. The contracting officer shall be responsible for all discretionary acts, opinions, judgments, approvals, reviews, and determinations required of the State under the terms of this agreement.

17. No assignment or transfer of this agreement or any part hereof, rights hereunder, or interest herein by the Ranch shall be valid unless and until the State has been notified of any sale or assignment.

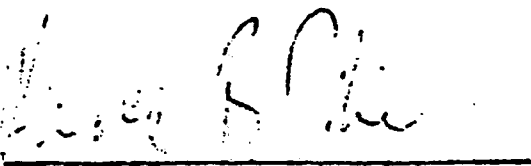

18. This agreement and all of its provisions shall apply to and bind the successors and assigns of the parties hereto.

19. It is the intent of the State to preserve the rights of all downstream water users and to the extent that any downstream users not a party to this agreement institute any action or proceedings for the purpose of protecting their rights to the flow of the Mojave River, the parties hereto will attempt to resolve any inconsistency that may exist between the provisions of this agreement and the rights of any other downstream users, and this agreement shall be subject to modification by any final judgment rendered in favor of any such party.

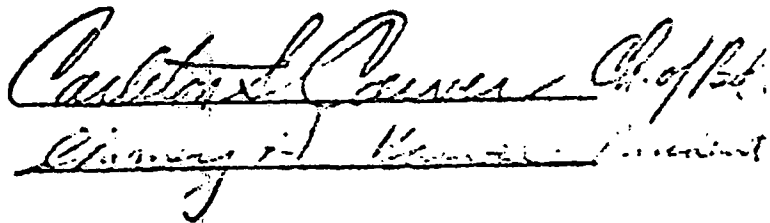

20. Any waiver at any time by any party hereto of its rights with respect to a default or any other matter arising in connection with this agreement, shall not be deemed to be a waiver with respect to any other default or matter.

IN WITNESS WHEREOF, the parties hereto have executed this contract on the date first above written.

| 1989 | | | | | | | | | | | | | No Flow |
| 1990 | | | | | | | | | | | | | No Flow |

- B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 75 Acres Pasture

Stockwatering 100 Head Stock

Domestic

Other (specify)

- C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

None

- D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

None

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

DATED: 6/21, 1991, at Laguna Niguel, California

Signature: 

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

STATEMENT OF WATER DIVERSION AND USE

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water LAS FLORES RANCH, LTD.
Address c/o Dennis Winton, 401 Fremont Lane, South Pasadena, California 91030
B. Name of body of water at point of diversion Horseshief Creek
Tributary to West Fork Mojave River, thence Mojave River
C. Place of diversion NE 1/4 NE 1/4 Section 31, Township 3 N, Range 4 W, 88 B&M,
San Bernardino County, or locate it on sketch of section grid on reverse side with regard to section lines or
prominent local landmarks.

D. Name of works Horseshief
E. Capacity of diversion works five (5) cubic feet per second
gallons-per-minute
gallons
acre-feet
Capacity of storage reservoir

State quantity of water used each month in gallons or acre-feet

| Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|-------|------|------|------|------|-----|------|------|------|-------|------|------|------|--------------|
| 1966: | x | x | x | x | | | | | | | | | 250 |

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock watered, etc.

Maximum annual water use in 1965: 250 gallons
acre-feet
Minimum annual water use in 1963: 0 gallons
acre-feet
Type of diversion facility: gravity ☒ pump ☐
Method of measurement: weir ☐ flume ☐ electric power meter ☐ water meter ☐ estimate ☒

F. Purpose of use (what water is being used for) Irrigation

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Sections 29 and 32, T. 3 N., R. 4 W., SBB&M

H. Year of first use as nearly as known 1900

I. Name of person filing statement Edward Fitzgerald Dibble
Position Consulting Engineer Organization LAS FLORES RANCH, LTD.
